# The Company

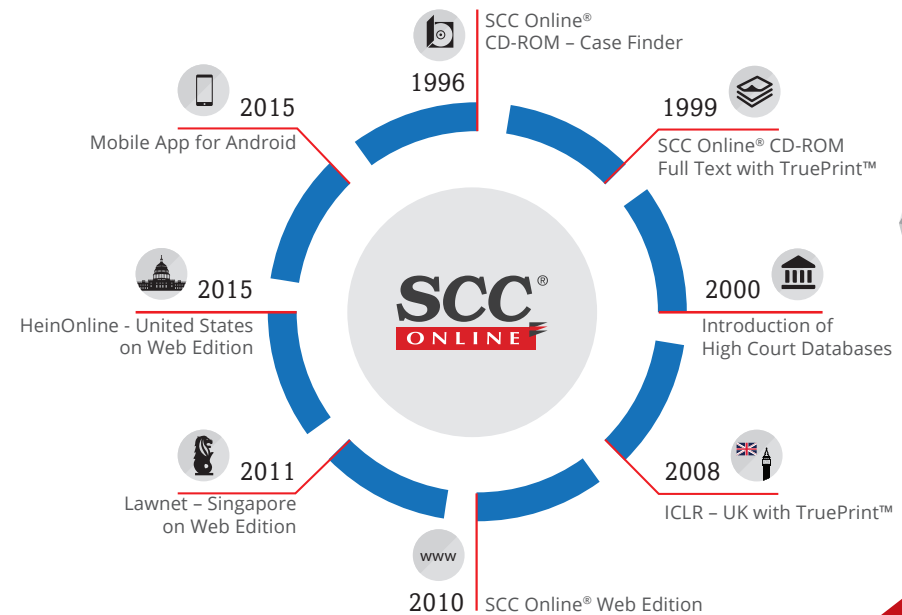

SCC Online®, pioneered the availability of electronic legal research resources in India in 1996 through introduction of its CD-ROM based software. With the proliferation of the Internet, we launched the Web Edition in 2010. With its growth and popularity, it has become the standard for legal research in India.

With an initial database based upon India's most trusted law report, "Supreme Court Cases" (SCC), we have added a huge amount of information that was carefully sourced and licensed from a consortium of top Indian and International law publishers to make our database the largest authentic law database in the Indian subcontinent.

In addition to our extensive coverage of Indian case law from the Supreme Court of India, all High Courts, Tribunals and Commissions as well as Statutory Law and Secondary Material, SCC Online® also contains legal information from several Foreign Jurisdictions and covers important International Law.

With a collection of over 300 databases, with more than 2.8 million documents and over 13.5 million pages our legal research resource provides top quality information with an interface which makes legal research a quicker, easier and more effective process.

SCC Online® is used everyday by advocates, judges, students, law firms, businesses, government organizations and academic institutions across the Indian subcontinent and the rest of the world!
