ABOUT MNLU MUMBAI

Maharashtra National Law University Mumbai, established under the Maharashtra National Law University Act 2014 on 20th March 2014, is one of the premier National Law Universities in India. The Act envisaged to establish National Law University in Maharashtra to impart advanced legal education and promote society-oriented research in legal studies for the advancement of societal life of the people in the country. The prime goal of the University is to disseminate advanced legal knowledge and processes of law amongst the students and impart in them the skills of advocacy, legal services, law reforms and make them aware and capable to utilise these instruments for social transformation and development.

ABOUT THE COURSE

India is one of the rapidly emerging knowledge economies. India has a robust Intellectual Property Rights (IPR) regime which fosters a culture of Innovation and technological development. However, there is a lack of awareness and misconception about the benefits and processes for the protection of IPRs. Hence, it becomes imperative to educate and demystify the stakeholders about the IPR system which shall not only stimulate innovation but also strengthen the IPR regime further.

The DPIIT IPR Chair, MNLU Mumbai and the University's Centre for Research in IP are organising 'One Week Online Certificate Course on Patenting System in India'. This online course is meticulously designed to impart legal and practical knowledge on the Indian patenting system, from evolution of patent system to guidance on conducting searches, patentability criteria, filing, drafting, interpreting and prosecution of patent applications, maintaining, commercialisation, licensing, assignments and enforcement mechanism under the Indian Patents Act. Apart from IPR academicians, faculties for the present course include senior officials of the Indian Patent Office and reputed IPR professionals who are known for their knowledge and expertise.

The course shall benefit all those engaged in manufacturing, services, businesses (especially MSMEs and Startups), IP education and research by enriching their knowledge, skill and expertise. The course shall also be helpful for those aspiring to appear for the patent agent examination.
